

putting safety first

Your partner in compliance, safe operations and risk mitigation

\$198 billion

the annual cost of fatal and non-fatal work injuries.

(National Safety Council, Injury Facts. 2014)

\$60 billion

annual cost of lost productivity caused by workplace injuries and illnesses.

(OSHA)

Creating a safe work environment is not only critical to attracting and retaining a reliable workforce, it also impacts your bottom line. From lost productivity and worker's compensation payouts to stinging OSHA fines, adherence to safety standards is essential to your organization's success.

Randstad is committed to maintaining a safe and accident-free workplace. We believe that job safety is a responsibility of all talent, temporary and permanent, and we will collaborate with you to ensure your safety targets are achieved.

Through our complimentary Safety Smart program, you have access to resources that help your business navigate all matters related to safe operations. Backed by a team of experts nationwide, our risk management team recognizes that continued safety in the workplace requires ongoing commitment and attention to detail. This can best be accomplished through client partnership, employee and talent engagement, compliance with Federal and local regulations and established best practices related to job tasks and responsibilities.

Randstad's exclusive Safety Smart program

As a Randstad client, a safety professional is available to provide you with the following benefits:

- Safety and risk consulting in support of incident reduction, to help you minimize injury severity, mitigate potential risks or exposures in the workplace and reduce your costs associated with safety and compliance issues.
- Guidance related to your Injury and Illness Prevention Program (IIPP) with the goal of reducing workplace incidents, recordable injuries and lost production time, as well as the financial consequences associated with such incidents.
- Design and implementation of behavioral-based safety programs to reduce workplace injuries and mitigate potential risks, ultimately improving your risk profile and employee morale.
- Assistance in incident investigation and claim examination with a goal to identify corrective actions and accelerate the claims process.

Randstad's Safety Smart program encourages talent engagement in safe operations and behavior-based safety tools to help ensure both full-time and temporary employees work safely, side by side.
